Golf for a Good Cause

Faces of NF

About NF (Neurofibromatosis):

NF affects as many as 1 in 2,500 people — a child is born with NF every 6 minutes. It does not discriminate, affecting people of all races, nationalities, ages and genders.

A genetic disorder, neurofibromatosis is tumors that develop on, and along the nervous system quite often affecting the face and head. NF can affect hearing and vision, cause developmental difficulties and in some cases be a source of chronic pain and discomfort.
